

SUNNY OJO

SENIOR FULL-STACK DEVELOPER

+234 912 253 9404 | njokusunnyojo@gmail.com | linkedin.com/in/sunny-ojo-njoku

PROFESSIONAL SUMMARY

Senior Software Developer with 7 years of experience specializing in PHP and Laravel backend architecture, high-performance RESTful APIs, NestJS microservices, and modern React/Next.js applications. Proven track record of delivering scalable fintech savings platforms, integrating LMS solutions with automated certification pipelines, and building enterprise operations software that reduced reliance on third-party SaaS platforms. Strong background in test-driven development (TDD), SOLID principles, database optimization, and scalable cloud-native deployments.

TECHNICAL SKILLS

Backend & APIs:	PHP, Laravel, NestJS, Node.js, Python, FastAPI, Express.js, RESTful APIs, TDD, Microservices
Frontend & Web:	React, Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, HTML5 & CSS3
Databases & Caching:	MySQL, Redis, Laravel Horizon, Elasticsearch, Typesense, Meilisearch
Cloud, DevOps & Tools:	Docker, DigitalOcean, Git, GitHub Actions, Stripe API, System Architecture

PROFESSIONAL EXPERIENCE

Senior Software Developer, DEL-YORK Group – Lagos, Nigeria	Jun 2021 – Present
--	--------------------

- Integrated Thinkific LMS API using Laravel into internal platforms to track student enrollment, progress, and performance with real-time reporting and automated certificate generation at scale.
- Built a company-wide intranet platform using Python (FastAPI) and Next.js, streamlining internal HR operations, eliminating third-party SaaS tools (Zoho), and significantly reducing annual software licensing costs.
- Architected and implemented high-concurrency RESTful APIs following SOLID principles and design patterns, improving system scalability and cross-service integrations.
- Developed and maintained scalable e-commerce and business applications using Laravel and React, delivering high-performance APIs and seamless user experiences.

Full-Stack Laravel / NestJS Developer, Credpal Technologies – Yaba, Lagos, Nigeria	Sept 2022 – Dec 2024
--	----------------------

- Designed and delivered high-throughput fintech savings products (Flexi, Dollar, Group, Vault) in Laravel, enabling flexible financial management for everyday customer use and boosting platform engagement.
- Integrated third-party insurance services into core applications using NestJS, enabling seamless policy management, automated premium calculations, and claims processing.
- Managed continuous feature enhancements across production microservices, ensuring high availability, peak system performance, and strict financial security compliance.

Senior Software Developer, MeatShare – Australia (Remote)

May 2024 – Feb 2026

- Built robust backend APIs using Laravel to handle complex multi-user checkout logic, including product quantity splits, dynamic pricing, and multi-party payment calculations.
- Integrated Stripe payment gateway at the API level for secure online payments, subscription management, shared transaction processing, and webhook handlers.
- Engineered reusable API endpoints and backend services using Laravel design patterns with Test-Driven Development (TDD) best practices.

EDUCATION

B.S. in Computer Science, Miva Open University – Yaba, Lagos State

May 2025

Senior School Certificate Examination (SSCE), Collins Memorial College

2009 – 2015
